### FUND MANAGER'S COMMENT

The FBMKLCI gained 1.8% mom in April, closing at 1,540.22, with much of the upward momentum occurring on the final trading day of the month. In contrast, the Small Cap Index fell by 1.6%, while the Mid 70 Index decreased by 2.0%.

Sector-wise in April, the top performing sectors were Telecommunications, Consumer, and Healthcare, up 4.8%, 4.1%, and 2.9% respectively. The worst performing sectors were Energy, Transport, and Technology, which saw declines of 9.8%, 5.2%, and 5.1%, respectively. Foreign investors continued to be net sellers for the seventh consecutive month in April, recording net sell flows of RM1.9bn, with outflows totaling RM19.6bn over the past seven months. Separately, in April, there were three listings on the ACE Market (Sumisaujana Group Bhd, MSB Global Group Bhd, and WTEC Group Bhd).

Near-term market direction remains closely tied to the progress of US tariff negotiations with key trading partners, including Malaysia. Meanwhile, investors face a complex mix of headwinds: US-China tensions, rising recession risks, Fed policy uncertainty, the ongoing US earnings season, and Malaysia's upcoming May reporting cycle. That said, valuations remain attractive, with the KLCI trading at 12.7x P/E—approximately 25% below its 10-year mean of 17x. Additionally, foreign shareholding remains near historic lows at 19.3% (as of March), signalling potential upside from further positioning flows.
