### FUND MANAGER'S COMMENT

The FBMKLCI Index gained 1.6% month-on-month (m-o-m) in June, closing at 1,532.96 points. Meanwhile, the Small Cap Index declined by 0.9%, while the Mid 70 Index increased by 1.2%.

Sector-wise in June, the top-performing sectors were Utilities, Energy, and Technology, up 4.3%, 3.9%, and 3.4%, m-o-m, respectively. The worst-performing sectors were Healthcare, Financials, and Property which saw declines of 5.4%, 1.1% and 0.4%, respectively. Foreign investors turned net sellers in June, recording RM1.3 billion in outflows. Separately, in June, there were two listings on the Main Market (Paradigm Real Estate Investment Trust and Cuckoo International (Mal) Bhd), four listings on the ACE Market (ICT Zone Asia Bhd, Signature Alliance Group Bhd, Hartanah Kenyalang Bhd, and Pan Merchant Bhd), and two listings on the LEAP Market (Ping Edge Technology Bhd and Myaxis Group Bhd).

The Malaysian market has been among the laggards in 1H2025, as lingering trade issues and heightened geopolitical risks weighed on investor sentiment and led to sustained foreign selling. We expect the Malaysian market to adopt a wait-and-see stance in 2H2025 as it digests the impact of a tariff-driven global slowdown, alongside domestic cost pressures from higher SST, RON95 fuel prices, and electricity tariffs. Despite these headwinds, strong domestic liquidity, attractive below-mean valuations, and supportive government initiatives—such as NETR, JS-SEZ, and NIMP 2030—could help cushion downside risks and support selective buying opportunities in the near term.
