PORTFOLIO OBJECTIVE

Discretionary investment portfolio that focuses on investing in equities of companies listed in the Asia Pacific region, utilizing quantitative investment methods. The objective of the portfolio is to achieve long-term total returns that surpass the performance of the benchmark. The portfolio is actively managed with the strategy to invest in companies with robust fundamental growth that are currently trading at comparatively lower valuations. This Portfolio is specifically designed for investors seeking long-term total returns and requires a minimum investment period of 5 years. Additionally, investors should be willing to tolerate occasional significant fluctuations in the net asset value under normal market conditions.

MANAGER'S COMMENTS

In June, the MSCI Asia Pacific Ex-Japan Index (+5.3% m-o-m) outperformed the MSCI World Index (+4.2% m-o-m), owed largely to South Korea's (+13.9% m-o-m) exceptionalism as its exports rebounded on strong tech demand. Taiwan (+4.3%) was also a winner of the tech revival, as its exports to the US exceeded those to China. Hong Kong (+3.4%) was also up on favorable exports, with news reporting elevated front-loading of shipments as businesses scrambled to beat the July US tariff deadline. At the opposite end of the spectrum, Thailand (-5.2%) struggled to regain its footing, extending losses to -22.2% year-to-date as conditions exacerbated following a political breakup. Indonesia (-3.5%) pulled back after a 2-month rally, as US tariff troubles loomed over its economy, prompting its government to ease import rules ahead of the July deadline.

On the monetary policy front, in June, the Federal Reserve (Fed) held interest rates steady at the 4.25% to 4.50% range during its meeting, as widely expected. Separately, the European Central Bank (ECB) cut interest rates by 25 basis points to 2.00%. The Bank of England (BoE) kept interest rates at 4.25%. In Asia, the People's Bank of China (PBoC) maintained the one-year LPR at 3.0% and the five-year LPR at 3.5%. The Bank of Japan left its key short-term interest rate unchanged at 0.5% during its June meeting. Finally, the Reserve Bank of India (RBI) cut its key repo rate by 50 basis points to 5.50%.

Global markets broadly rebounded in May and June, supported by a 90-day pause on key U.S. tariffs. By late June, only one formal trade deal—between the U.S. and U.K.—had been finalized. While U.S.-China tensions have eased slightly, we believe the overall trade environment remains uncertain, with geopolitical risks in the Middle East flaring up on and off, keeping investors cautious. Separately, on the monetary policy front, major central banks have shifted toward easing in response to softer growth and moderating inflation, though the U.S. Federal Reserve remains an exception, holding rates steady due to concerns over tariff-driven inflation. Although the Fed has maintained its projection for potential rate cuts this year, we believe it would not be surprising if rates remain elevated for longer in order to contain renewed inflationary pressures, given the continued strength of the economy and labor market. Against this backdrop, we emphasize the importance of diversification and a focus on quality amid volatility.
