MANAGER'S COMMENTS

The MSCI Asia Pacific Ex-Japan Index (+1.4%) lagged the MSCI World Index (+2.5%) despite an exceptionally strong showing from regional corporates. China (+10.3%) staged a spectacular rally, fueled by increased buying activity from domestic investors as low interest rates and a lack of alternatives drove retail and institutional investors back into equities. Indonesia (+4.6%) continued its strong performance despite heated protests demanding government action on economic hardships. Malaysia (+4.1%) also surged strongly thanks to robust GDP growth and resilient corporate earnings. In contrast, Korea (-1.8%) underperformed as exports to the US declined double digits as tariff risks crystallized. The Philippines (-1.6%) continued its steady drop despite lower inflation and a policy rate cut. India (-1.4%) also caught the short end of the stick as the US' targeted tariffs took effect in response to India's trade relations with Russia.

On the monetary policy front, the Bank of England cut interest rates by 25 basis points to 4.00%. In Asia, the People's Bank of China (PBoC) maintained the one-year LPR at 3.0% and the five-year LPR at 3.5%. The Reserve Bank of India (RBI) kept its key repo rate unchanged at 5.50% during its August meeting. Within ASEAN, Bank Indonesia (BI) cut its benchmark interest rate by 25 basis points to 5.00%, while the Bangko Sentral ng Pilipinas lowered its Target Reverse Repurchase (RRP) Rate by 25 basis points to 5.00%. The Bank of Thailand (BOT) cut its benchmark interest rate by 25 basis points to 1.50%.

Globally, the US market outlook remains cautiously optimistic into late 2025, supported by resilient consumer spending and easing labour tightness, though inflationary pressures linger. At Jackson Hole, Fed Chair Jerome Powell indicated rate cuts could begin in September, potentially lifting equities, but stretched valuations—highlighted by the Warren Buffett Indicator—warrant caution. In China, August delivered a solid rally as exports and high-tech sectors underpinned growth. Policy signals and supply-side reforms aim to address overcapacity and stabilise profitability, but weak domestic demand and execution risks remain key challenges. We recommend a barbell strategy through 2025, combining quality growth opportunities with defensive income assets to navigate potential volatility.
