*The portfolio performance is based on a composite of all individual portfolios under the same mandate type and does not represent any specific portfolio. Returns are calculated using a composite Time-Weighted Rate of Return (TWRR), with individual portfolio returns weighted by their beginning-of-period asset values to account for varying portfolio sizes and cash flows. For more details on how the composite return is derived, please refer to the article titled "Understanding Private Mandate" on www.phillipinvest.com.my.

FUND MANAGER'S COMMENT

The typical portfolio registered a return of 3.35% in August, which was higher than the benchmark absolute 5% return p.a. of 0.41%.

Globally, the US market outlook remains cautiously optimistic into late 2025, supported by resilient consumer spending and easing labour tightness, though inflationary pressures linger. At Jackson Hole, Fed Chair Jerome Powell indicated rate cuts could begin in September, potentially lifting equities, but stretched valuations—highlighted by the Warren Buffett Indicator—warrant caution. In China, August delivered a solid rally as exports and high-tech sectors underpinned growth. Policy signals and supply-side reforms aim to address overcapacity and stabilise profitability, but weak domestic demand and execution risks remain key challenges. We recommend a barbell strategy through 2025, combining quality growth opportunities with defensive income assets to navigate potential volatility.

Locally, 2Q25 reporting was largely in line with expectations, except for EMS and O&G, which underperformed. Consensus now forecasts KLCI earnings to grow in the mid-single digits in 2025 and 2026. We believe Malaysia offers appealing valuations across PE, PB, and the earnings-MGS yield spread, helping sustain investor optimism. We also believe easing US policy uncertainties, including front-loaded Trump measures and greater clarity on tariffs, along with ample domestic liquidity, provide scope for markets to grind higher into 4Q25 and 2026.
