*The portfolio performance is based on a composite of all individual portfolios under the same mandate type and does not represent any specific portfolio. Returns are calculated using a composite Time-Weighted Rate of Return (TWRR), with individual portfolio returns weighted by their beginning-of-period asset values to account for varying portfolio sizes and cash flows. For more details on how the composite return is derived, please refer to the article titled "Understanding Private Mandate" on www.phillipinvest.com.my.

FUND MANAGER'S COMMENT

The typical portfolio registered a return of 0.98% in August, which was lower than the benchmark F4GBM's return of 3.05%. Meanwhile, the Small Cap Index inched up 0.1%, while the Mid 70 Index decreased by 0.8%.

Sector-wise in August, the top-performing sectors were Construction, Technology, and Finance, up 5.9%, 5.6%, and 5.6%, m-o-m, respectively. The worst-performing sectors were Healthcare, REITs, and Telecommunication, which saw declines of 5.3%, 2.4% and 2.4%, respectively. Foreign investors continued to be net sellers in August, recording RM3.4 billion in outflows. There were no new listings in August.

2Q25 reporting was largely in line with expectations, except for EMS and O&G, which underperformed. Consensus now forecasts KLCI earnings to grow in the mid-single digits in 2025 and 2026. We believe Malaysia offers appealing valuations across PE, PB, and the earnings-MGS yield spread, helping sustain investor optimism. We also believe easing US policy uncertainties, including front-loaded Trump measures and greater clarity on tariffs, along with ample domestic liquidity, provide scope for markets to grind higher into 4Q25 and 2026.
