*The portfolio performance is based on a composite of all individual portfolios under the same mandate type and does not represent any specific portfolio. Returns are calculated using a composite Time-Weighted Rate of Return (TWRR), with individual portfolio returns weighted by their beginning-of-period asset values to account for varying portfolio sizes and cash flows. For more details on how the composite return is derived, please refer to the article titled "Understanding Private Mandate" on www.phillipinvest.com.my.

FUND MANAGER'S COMMENT

The MSCI Asia Pacific Ex-Japan Index (-3.0%) broke its 2-month hot streak and tumbled against the MSCI World Index (+0.2%) as key Asian powerhouses led to the downside. Indonesia (+4.2%) bucked the regional trend, rallying to a record high on strong economic data and prospect for further rate cuts. Singapore (+2.2%) also charted new all-time highs despite slower GDP growth but offset by strong pharmaceutical and electronics factory output. Not to be left behind, India (+1.9%) continued its rally and closed November a smidge above past record high, propelled by exceptional GDP growth beating forecasts. On the other hand, South Korea (-4.4%) faced a correction with its sharpest decline since Jan'24 as Big Tech names tumbled on renewed concerns of an AI bubble. Thailand (-4.0%) erased October's recovery gains as widespread flooding threatens its economy. China (-2.5%) markets slid as its economy.

We remain neutral on global equities, mainly the US, as elevated valuations and heavy concentration in a few mega-cap technology names limit broad market upside despite still-robust earnings growth. However, we remain constructive on Asia Pacific ex-Japan equities, particularly in North Asia, supported by a weaker US dollar and a more dovish Federal Reserve. Further easing by the Fed would give Asian central banks greater flexibility to lower interest rates, which in turn could further support regional market sentiment. We maintain a barbell strategy through 2025, combining quality growth opportunities with defensive income assets to navigate potential volatility.
