\*The portfolio performance is based on a composite of all individual portfolios under the same mandate type and does not represent any specific portfolio. Returns are calculated using a composite Time-Weighted Rate of Return (TWRR), with individual portfolio returns weighted by their beginning-of-period asset values to account for varying portfolio sizes and cash flows. For more details on how the composite return is derived, please refer to the article titled "Understanding Private Mandate" on [www.phillipinvest.com.my](http://www.phillipinvest.com.my).

### FUND MANAGER'S COMMENT

Sector-wise in December, the top-performing sectors were Finance, Industrial, and Plantation, which rose 6.1%, 5.9%, and 3.1% m-o-m, respectively. The worst-performing sectors were Construction, Technology, and Utilities, which lost 4.8%, 3.5%, and 0.9% m-o-m, respectively. On a YTD basis, Plantation, REITs, and Finance were the only top-performing sectors, gaining 8.8%, 8.3%, and 2.8% y-o-y, respectively. The worst-performing sectors were Healthcare, Technology, and Telecommunication Services, losing 35.9%, 14.5%, and 13.6% y-o-y, respectively.

Following robust gains in December, we do not rule out the possibility of profit-taking, as investors continue to digest heightened geopolitical risks. These include the reported capture of Venezuelan President Maduro by the US, the potential for US intervention in Iran should civil unrest escalate, and ongoing tensions between China and Japan. That said, Malaysia's fundamentals remain supportive, underpinned by solid GDP growth (2025/26: 4.7%/4.3%), undemanding valuations (2026F P/E: 14.5x vs 5-year mean of 17.2x), a strengthening ringgit (+9.3% vs end-2024), and healthy core earnings growth of 6-8% in CY26. Private consumption is set to remain the main growth driver in 2026, supported by a tight labour market, steady wage growth, and strong household confidence, with high-value sectors like AI, data centres, and advanced manufacturing further boosting growth.
