*The portfolio performance is based on a composite of all individual portfolios under the same mandate type and does not represent any specific portfolio. Returns are calculated using a composite Time-Weighted Rate of Return (TWRR), with individual portfolio returns weighted by their beginning-of-period asset values to account for varying portfolio sizes and cash flows. For more details on how the composite return is derived, please refer to the article titled "Understanding Private Mandate" on www.phillipinvest.com.my.

**Effective 1 September 2023, the benchmark of FBM EMAS Shariah is changed to Target Return of 5.0% p.a.

FUND MANAGER'S COMMENT

Tensions between the United States, Israel and Iran have escalated significantly during Donald Trump's second presidency. The first major escalation happened in June 2025, when Israel launched large-scale strikes on Iran's nuclear and military facilities. Iran responded with waves of missiles and drones targeting Israel, leading to a brief 12-day conflict. The US later joined with strikes on Iranian nuclear sites, showing its willingness to directly intervene to curb Iran's nuclear ambitions. The confrontation flared up again in February 2026, when the US and Israel carried out another coordinated round of strikes on Iranian military and leadership targets. While markets usually react with short-term fear, we believe the most likely outcome is a prolonged period of ongoing conflict rather than a full-scale war. In this environment, a barbell strategy balancing high-quality growth exposures with income-oriented assets remains well suited to navigating bouts of volatility.

4Q2025 results were broadly in line overall. Outperformers were mainly seen in Healthcare, selected Consumer names, Utilities and Property. Underperformers were concentrated in Construction, Industrial, Telecommunications & Media, and parts of Technology, reflecting margin and demand pressures. On a separate note, we view the conflict between the United States, Israel and Iran presents second-order impacts to Malaysia - transmitted largely via oil prices and capital flows. Malaysia's direct trade exposure to Iran remains structurally minimal. We remain focused on domestically oriented sectors, as well as quality and dividend-paying stocks.
