Shariah									

\*The portfolio performance is based on a composite of all individual portfolios under the same mandate type and does not represent any specific portfolio. Returns are calculated using a composite Time-Weighted Rate of Return (TWRR), with individual portfolio returns weighted by their beginning-of-period asset values to account for varying portfolio sizes and cash flows. For more details on how the composite return is derived, please refer to the article titled "Understanding Private Mandate" on www.phillipinvest.com.my.

### COUNTRY ALLOCATION

\*Actual holdings and allocation may vary from the model portfolio based on factors such as the amount invested, risk profile, and timing.

### TOP HOLDINGS

- Eq8 Dow Jones U.S. Titans 50 ETF

- Eq8 MSCI SEA Islamic Dividend ETF
- Eq8 MSCI Malaysia Islamic Dividend ETF
- TradePlus Shariah Gold Tracker MYR

\*Actual holdings and allocation may vary from the model portfolio based on factors such as the amount invested, risk profile, and timing.

### FUND MANAGER'S COMMENT

The MSCI Asia Pacific Ex-Japan Index (-13.5%) suffered a devastating selloff compared to the MSCI World Index (-6.6%) with emerging markets taking the brunt of the impact from US & Israel's war against Iran. No index was spared from the selloff as all major markets registered a decline in March. South Korea (-19.1%) erased all of February's gains as rising oil prices weighed on the outlook for the energy-import dependent economy, while concerns over Google's new research development titled TurboQuant—an AI compression algorithm that could significantly reduce memory requirements for large language models—sparked a selloff in memory-related stocks. Indonesia (-14.4%) also tumbled on oil price woes with the government enacting work-from-home mandates for public employees and other initiatives to cut down on fuel consumption. India (-11.3%), the world's second largest net importer of crude oil, was struck with a double setback, as its rapidly weakening rupee and ballooning input costs hampered its high growth outlook. Malaysia (-1.5%) was the unsung hero of March, as its net energy exporter status helped cushion the decline considerably compared to regional peers.

Following President Trump's recent remarks regarding the seizure of Iranian export hubs like Kharg Island, we anticipate further escalation for several weeks before any diplomatic intervention to end the conflict occurs. While markets often react with short-term volatility, we believe this presents opportunities for disciplined, long-term investors. In this environment, a barbell strategy balancing high-quality growth exposures with income-oriented assets remains well suited to navigating bouts of volatility, while incorporating broader diversification to serve as a critical hedge against potential energy shocks.
