\*The portfolio performance is based on a composite of all individual portfolios under the same mandate type and does not represent any specific portfolio. Returns are calculated using a composite Time-Weighted Rate of Return (TWR), with individual portfolio returns weighted by their beginning-of-period asset values to account for varying portfolio sizes and cash flows. For more details on how the composite return is derived, please refer to the article titled "Understanding Private Mandate" on [www.phillipinvest.com.my](http://www.phillipinvest.com.my).

### FUND MANAGER'S COMMENT

Data as of 31 May 2026

Within the KLCI, the top three gainers for May were YTL Power International Bhd (+6.7%), Maxis Bhd (+6.0%), and Press Metal Aluminium Holdings Bhd (+4.2%). Meanwhile, the top three decliners were Petronas Dagangan Bhd ( -12.6%), Nestle Malaysia Bhd (-11.6%), and Axiata Group Bhd (-11.1%).

Malaysia is expected to maintain a gradually stabilising, though still cautious, macro backdrop in June as global volatility continues to moderate. However, external demand remains uneven, with mixed growth signals from the US and China continuing to affect export momentum and the ringgit. Domestic demand remains the key support, underpinned by resilient household spending and stable labour market conditions. Against this backdrop, we stay constructive on selected domestic-oriented sectors, especially those linked to rising electricity demand from data centre expansion and continued momentum in renewable energy investment. We are also increasingly positive on the technology sector as visibility in order flows improves, supported by sustained AI-related capex from global leaders. Accordingly, our strategy continues to favour a barbell approach anchored on large-cap, high-quality companies with strong balance sheets and reliable dividend yields, while selectively complemented by exposure to firms with clear earnings growth potential from structural thematic drivers.
