**The portfolio performance is based on a composite of all individual portfolios under the same mandate type and does not represent any specific portfolio. Returns are calculated using a composite Time-Weighted Rate of Return (TWRR), with individual portfolio returns weighted by their beginning-of-period asset values to account for varying portfolio sizes and cash flows. For more details on how the composite return is derived, please refer to the article titled "Understanding Private Mandate" on www.phillipinvest.com.my.*

FUND MANAGER'S COMMENT

Data as of 31 August 2026

Within the KLCI, the top three gainers for August were YTL Power International Bhd (+35.9%), YTL Corporation Bhd (+29.2%), and Sunway Healthcare Holdings Bhd (+10.4%). Meanwhile, the top three decliners were MR D.I.Y. Group (M) Bhd (-13%), Petronas Chemicals Group Bhd (-11.5%), and Axiata Group Bhd (-8.5%).

Malaysia's macroeconomic backdrop strengthened in August, supported by robust domestic demand and sustained external-sector momentum. Second-quarter GDP growth accelerated to 6.0% year-on-year, driven by household spending, investment activity and strong exports, particularly electrical and electronic products benefiting from AI-related demand. The services and manufacturing sectors remained central to the expansion, while the growing operationalisation of data centres provided an additional lift to ICT activity. Inflation remained manageable, with July headline CPI moderating to 1.8% year-on-year from 1.9% in June, while the ringgit strengthened during the month amid resilient fundamentals and easing concerns over near-term US monetary tightening. Malaysia's manufacturing sector also remained in expansion for a third consecutive month, supported by sustained new-order growth and a recovery in employment.
