* based on market value of the Assets as at each calendar month, payable to the Custodian on a monthly basis

PORTFOLIO PERFORMANCE CHART

Data as of 31 August 2026

	1M	3M	6M	YTD	1Y	2Y	3Y	5Y	Since Inception
Portfolio	2.22%	1.91%	6.97%	9.02%	8.94%	3.64%	12.99%	-	12.57%
Abs 5%	0.41%	1.23%	2.47%	3.31%	5.00%	10.25%	15.76%	-	13.15%

*The portfolio performance is based on a composite of all individual portfolios under the same mandate type and does not represent any specific portfolio. Returns are calculated using a composite Time-Weighted Rate of Return (TWRR), with individual portfolio returns weighted by their beginning-of-period asset values to account for varying portfolio sizes and cash flows. For more details on how the composite return is derived, please refer to the article titled "Understanding Private Mandate" on www.phillipinvest.com.my.

**Effective 1 September 2023, the benchmark of FBM KLCI is changed to Target Return of 5.0% p.a.

COUNTRY ALLOCATION

Data as of 31 August 2026

*Actual holdings and allocation may vary from the model portfolio based on factors such as the amount invested, risk profile, and timing.

Data as of 31 August 2026

- Phillip Master Equity Growth Fund
- Manulife Investment U.S. Equity MYR Fund
- KAF Core Income Fund
- Principal Asia Pacific Dynamic Income MYR Fund
- RHB Islamic Bond Fund

*Actual holdings and allocation may vary from the model portfolio based on factors such as the amount invested, risk profile, and timing.

FUND MANAGER'S COMMENT

Data as of 31 August 2026

Malaysia's macroeconomic backdrop strengthened in August, supported by robust domestic demand and sustained external-sector momentum. Second-quarter GDP growth accelerated to 6.0% year-on-year, driven by household spending, investment activity and strong exports, particularly electrical and electronic products benefiting from AI-related demand. The services and manufacturing sectors remained central to the expansion, while the growing operationalisation of data centres provided an additional lift to ICT activity. Inflation remained manageable, with July headline CPI moderating to 1.8% year-on-year from 1.9% in June, while the ringgit strengthened during the month amid resilient fundamentals and easing concerns over near-term US monetary tightening. Malaysia's manufacturing sector also remained in expansion for a third consecutive month, supported by sustained new-order growth and a recovery in employment.

Regional and global markets improved in August as easing expectations of near-term US monetary tightening and strong corporate earnings supported risk appetite. The MSCI Asia Pacific ex-Japan Index gained 3.0%, outperforming the MSCI World Index's 2.5% increase, with market leadership concentrated in Taiwan and South Korea amid continued optimism over AI infrastructure spending, semiconductor demand and positive earnings revisions. Improved foreign inflows and resilient export growth further supported technology-oriented Asian economies. Nevertheless, performance remained uneven across the region, with the Philippines, Thailand, India and Hong Kong declining amid domestic growth concerns and cautious investor sentiment. Inflation risks also remained relevant, particularly for energy-importing economies, while regional central banks continued to balance growth support against currency volatility and potential price pressures.
